

M500 sliding gate

The Heras M500 sliding gate combines optimum flexibility with security. The ideal access control for your building site. Links up perfectly with your building fences. Clever and strong, plug and play.

High-quality aluminium forms the basis of this smoothly-running, maintenance-free gate. The extra-fine mesh of the welded-mesh panel and the serrated strip provide climb-over protection. Heras delivers the M500 sliding gate completely assembled on an industrial floor slab, including remote control.

The welded-mesh panel has a protective coating as standard. The clear width is 7,000 mm. The height is 2,000 mm.

- maintenance-free
- quick assembly
- personal safety facilities

Sliding gate M500

Smooth running

Safe, rounded corners

Climb-over protection

Clever and strong

Compact sliding gate for the building site. One fixed point of entrance and exit for all employees, visitors and suppliers.

The gate can be opened and closed by remote control. It complies with the European EN 13241.01 standard.
